

Dr Anna Clark
Head of Decommissioning and Remediation
Nuclear Decommissioning Authority

Anna joined the NDA in 2007 where she is responsible for the strategic approach to decommissioning and remediating the UK's civil nuclear legacy. She also supports Government and other parts of the NDA with policy and strategy development. For example, she was integral in developing the business case for changing management arrangements at Sellafield.

Anna has a PhD in geophysics and worked as a consultant on conventional engineering and environmental projects before moving to the nuclear sector 15 years ago.

Anna represents the UK at the Nuclear Energy Agency's Working Party on Decommissioning and Dismantling, and on occasion provides consultancy support to the International Atomic Energy Agency.
