

Biography for Mark Triplett for Fukushima Forum

Mark Triplett is a Senior Advisor at the Pacific Northwest National Laboratory (PNNL) in the Risk and Decision Sciences Group. He has more than 30 years of experience at PNNL in waste management systems analysis, decision analysis for environmental restoration, and risk communication. Mr. Triplett has worked on many aspects of the Hanford site cleanup, including soil, groundwater and tank waste cleanup. Mr. Triplett leads PNNL's support to Fukushima decommissioning through partnerships with multiple Japanese organizations. During 2013, he supported Japan's Ministry of the Environment through the US State Department's Embassy Science Fellowship program.
