

## **- Biography -**

**Name: Tadahiro Washiya**

**Company: Japan Atomic Energy Agency (JAEA)**

**Title : Division Head**

**Division : Fuel Debris Handling and Analysis Division,  
Collaborative Laboratories for Advanced Decommissioning Science  
(CLADS),  
Sector of Fukushima Research and Development**

**Background :**

**1988, Entered in Power Reactor and Nuclear Fuel Development Corporation ( former JAEA ) . Engaged in research and development for the FBR spent fuel reprocessing technology more than 20 years, and after 1F accident occurred, involved in research and development for 1F decommissioning. As a member of IRID, leading a national research project on fuel debris characterization and analysis for 1F decommissioning. Since in April, 2015, Collaborative Laboratories for Advanced Decommissioning Science (CLADS) was established and engaged in the current position. Main research background is aqueous and pyrochemical separation, crystallization technology, mechanical designing on advanced reprocessing device, fuel debris characterization.**
